The Art of Change Leadership: How to Flex in Times of Flux

Leadership in today's fast-paced environment demands a facility to flex in times of flux. Agility, adaptability and innovation are key attributes of leaders who will drive change and transformation in the future of work. This keynote address will offer insights and strategies to help you proactively map your future in leadership.

Leadership in the Midst of Technological Change

New technology brings new challenges to the workforce and management. During this session, a panel of CFOs will review the impact of technological change in their organizations and share insights on leveraging innovations, such as RPA, analytics and blockchain, to improve efficiency and effectiveness.

Service Delivery Transformation — A Blueprint for Higher Quality, Lower Costs and Greater Management Control

Where and how government performs work varies according to needs. The key is applying the appropriate service delivery model for optimized internal controls, customer service, efficiency and value to the mission. Come explore various models for your agency, from shared services to centers of excellence, to increase savings and impact.

Turn the Trend Around: Stop Improper Payments

Improper payments from the federal government have risen steadily since 2003, when the Improper Payment Information Act was implemented. In 2017, the total was staggering – nearly \$1.4 trillion was disbursed incorrectly since 2003. Learn what agencies are doing to turn this trend around.

Reading the Political Landscape

Carl Cameron applies decades of election coverage and a comprehensive understanding of the American political process to provide a true insider's analysis of the 2018 midterms. Attendees will gain a comprehensive understanding of the American political process and a true insider's analysis of the 2018 midterms. The session will also highlight how the election results will impact the House, Senate and the Trump presidency, as well as the many businesses and industry implications.
