Tech Thursday Presentation June 4, 2020

8:30a.m. – 9:00a.m.

DevOps in Principle and in Practice

Fill up your coffee cup and join us for an informative presentation on **DevOps in Principle and in Practice**, Thursday June 4 from 8:30-9:00a.m.! Twenty-minute presentation followed by ten-minutes of Q&A.

Laird Williams, Senior Consultant, Macro Solutions, will provide a functional understanding of DevOps in the modern application deployment environment and how a Lean approach can help scale the barriers that exist between business, IT and security.

Speaker Bio

Laird Williams, Senior Consultant, Macro Solutions

Laird Williams has over 30 years of experience in software engineering, deployment, operations, and maintenance for everything from embedded to distributed systems in domains ranging from avionics and telecommunications to financial services. As a chief engineer and lead architect for both private and public sector enterprises, he and his products have received multiple patents and awards for leadership and innovation. He is presently a technical lead and service delivery manager for a large-scale DevOps enablement group in the public sector. He is a committed lean-agile practitioner and has been a practitioner of a variety of agile and pre-agile disciplines and methods for over 15 years. He currently holds Safe DevOps Practitioner (SDP), Safe Program Consultant (SPC), Advanced Certified ScrumMaster (A-CSM), and PMI-ACP certifications.
