

2010 - current

With the renewed focus on transparency, we did our part by putting together our first member-centric report in 2011. Additionally, we were able to create and fill a new board position - Accountability Outreach Coordinator.

The national PDC returned to Dallas in July 2013 with the theme Big Challenges, Bigger Thinking. More than 1200 government finance professionals gathered to gain valuable insights and tactics to be successful within today's austere environment. Attendees learned about shared service strategies, attracting and retaining the iGENs, data-sharing and ways to build a leaner government. We had several members on the host committee and we sponsored three community service events - a blood drive, a fundraising drive for SG Komen, and a Habitat for Humanity build day.
