Tech Thursday Presentation November 5, 2020

8:30a.m. – 9:00a.m.

Rethinking the Relationship Between Financial and Performance Management Technologies

Fill up your coffee cup and join us for this informative presentation on Thursday November 5 from 8:30-9:00a.m.! Twenty-minute presentation followed by ten-minutes of Q&A.

Over the last decade, finance teams and leaders have transformed their organizations to better navigate through digital disruption. Today, many face new demands to address risk & compliance, as well as challenges attracting top talent and reshaping business models. Further, transformative technologies like blockchain, robotic process automation and machine learning are forcing finance leaders to think differently about how they will transact, report, and analyze their business in the future. Still, despite billions of dollars invested into ERPs and various other supporting IT solutions – almost 50% of CFOs do not believe they are prepared to meet the demands of the strategic and evolving priorities of their business.

Join this event to learn how to transform financial processes, increase collaboration with operations, and unleash the true value of finance as a strategic business partner across the financial close, reporting and budget formulation process.

Presenters

Michael Germaine

Michael Germaine joined OneStream four years ago, bringing his deep knowledge of Enterprise Performance Management, Business Intelligence, Financial Solutions, and Analytics experience to the company. Prior to joining OneStream, Michael oversaw the North Carolina and Virginia regions for the Hyperion Suite of Products. Michael has been instrumental in the growth of OneStream and serves as Vice President for North America Public Sector.
